All-In-One™

The new **All-In-One™** label exclusively from MED-LABEL, INC. is the latest break through in label technology specifically designed for sterilization procedures in the healthcare market. This next generation label material performs better than all previous sterilization labels as well as fully complying with today's tough sterilization demands. *It works in steam, gas and STERRAD Systems — ONE LABEL FOR ALL YOUR LABELING NEEDS.*

The **All-In-One™** universal label will help you reduce costly mistakes by having only one label for all your daily sterilization processes. It will increase efficiency and performance by not having to choose which label (paper or STERRAD) to load in the label tool for your next cycle. Additionally, it will reduce both tracking of multiple label inventory and multiple label order processing, to one item. MAKE THE EASY DECISION, CHOOSE THE **All-In-One™** LABEL FROM MED-LABEL, INC.

M20-0057

L22-1004
YELLOW LABEL
BLACK PRINT

Under the MM20 General Storage Ruling for Stability of Meds - THE OPERATING ROOM IS REQUIRED to indicate the expiration DATE ON THE I.V. BAGS once the liquid has been warmed in the warmers. This requirement exists because the warming of the I.V. bags negates and shortens the manufacturers original warranty period for the sterility of their product. Consequently a new shortened expiration date needs to be **legibly** applied to the I.V. bag to satisfy JHACO guidelines. Hand written dates, with a magic marker, can and have recently caused hospitals to be scrutinized by JHACO for violating legibility requirements. Let MED-LABEL, Inc. facilitate your labeling task to be 100% legible with JHACO inspection requirements.

Central Sterile Labeling & Tracking

SteriTag™ System

Tracking Sterilization Tags

New SteriPocket™ Safely Place your Surgical Instrument Count Sheet, Vendor Form, Loaner Sheet all outside the tray...

The new SteriPocket™ color tag system offers a convenient pocket slit that will allow you to insert essential forms along with your items. SteriPockets can help to eliminate potential contamination from chemicals, toner and ink from the paper forms during the sterilization process. Security forms, surgical instrument count sheets, loaner data sheets and special instruction forms can now travel safely and efficiently with your trays. SteriPocket™ color tags combined with our synthetic paper sheets and/or SteriTrack™ (synthetic barcode labels) are validated for all sterilization processes like Steam, ETO and STERRAD® System.

Our SteriTag™ Tracking System solution is available in several colors. You can write directly on the tag or apply your synthetic barcode label to further enhance your system.

The SteriPockets™ System is fast and efficient. It is the most cost effective solution to properly organize and identify your items or trays.

White SteriPocket
CAT# L51-T005SW

Yellow SteriTag Pocket

CAT# L51-T005YS

Shown with synthetic laser sheet

- Prioritize your trays with SteriTags
- Eliminate tray contamination by using SteriPockets
- "Write" friendly material surface
- ASP Validated-Steam, Gas & Sterrad compatible
- Six colors of SteriTags available
- Two colors of SteriPockets available
- Fully compatible with all tracking systems
- Steri-synthetic laser sheets 8.5 X 11
- Use sterilization label as security seal on SteriPocket

SteriTags™ are manufactured with our exclusive synthetic material that have been fully tested for all sterilization procedures such as Steam, ETO and STERRAD (ASP Validated) including all washing actions.

Without delay, you can start your secure and cost effective item management solution today. Simply write your information directly on the tag or place your tracking label over your SteriTag™ or SteriPocket™ color of choice over and over again! Custom prints, additional colors and designs are available.
