Yeah, about that whole FFXI synth chart...

Forget it, it was debunked YEARS ago.

The original chart I made was an attempt to prettify a bunch of ASCII versions I had
seen and make it so my LS could run some tests using a standardized chart.

It was proven wrong a long time ago, but I forgot to take it down until just now.
(June 2012)

So, now it's taken down and that's that.

Thanks anyway ☺

And sorry for misleading everyone for so long, I had no idea it had been passed
around so much.
